About the CME

Theme of the CME: *Role of diet and millets in prevention, control and management of Non-Communicable Diseases (NCDs)*

Objectives of the CME: The objectives of the CME are to:

- Discuss the role of diet in prevention, control and management of NCDs thereby facilitating their reversal
- Discuss the evidence on reversal of NCDs
- Discuss the available evidence on role of diet and millets on reversal/management/control/prevention in major NCDs
- Discuss the need for policy reforms towards agricultural practices, crop diversification, promoting the cultivation of foods affecting development of NCDs
- Discuss evidence on millets as potential solution to NCD menace

Key highlights:

- There will be thematic sessions on role of diet in prevention, control and management of NCDs: cancer, vascular diseases, diabetes, chronic kidney diseases, respiratory disorders and Panel discussion on dietary implications of NCD reversal
- Exhibition on Determinants of NCDs

Expected outcomes:

- Increased focus on NCD prevention using dietary management
- Promotion of research on role of diet on NCD reversal
- Investment of research bodies to strengthen evidence on role of millets as potential NCD fighter foods
- Policy interventions to promote healthier agricultural practices

Participants: Program Officers, Medical Officers in the NCD cell at state/district/sub-district level, private practitioners, faculty, resident doctors working in related departments of Community Medicine, Medicine, Cardiology, Pulmonary Medicine, Radiology, Radiotherapy, Neurology and Nursing Colleges.. Limited seats are available, on “first come, first served” basis.

Certificate: A certificate of participation will be issued at the end of course

Venue: Postgraduate Institute of Medical Education and Research (PGIMER), Chandigarh-160012, India

The registration for the International CME is complementary to those who register for the International NCD Course 2nd to the 6th of March 2023. For more details, visit **www.worldncdfederation.org**

About the World NCD Federation

World NCD Federation is a professional association working for universal health care of major Non-communicable diseases (NCDs). The objectives of the federation are to:

- Work for prevention and control of NCDs, mainly diabetes, cardiovascular diseases (CVDs), chronic respiratory diseases (CRDs), cancer, stroke, chronic kidney diseases (CKDs), and mental health issues at international level especially developing countries.
- Organize professional activities, meetings and trainings at global, regional and national level to promote public health approaches for prevention and control of chronic NCDs.
- Build partnership with like-minded professional associations and focus on evidence-based public health interventions, so that scarce resources are used optimally in developing countries.
- Work for capacity building for surveillance, monitoring, implementation of NCD prevention and control policies and programmes and evaluation at national, regional and international level.
- Promote research in noncommunicable diseases by capacity building and supporting national, regional and international multi-centric studies.
